Solving Problems on HackerRank

WORK EXPERIENCE

Associate Software Developer

SynRadar

February 2022 - current / Mumbai

- Designed, developed, and modified software systems and custom components
- Wrote 200+ unit tests to verify the functionality of user interfaces, back-end processing, connectivity, and relational database interactions
- Planned, tracked, and managed deliverables on 20+ short-term sprints and 5+ long-term deployments
- Developed 10+ new application features and distributed services that support high-scale applications
- Developed code following common security practices and development design patterns
- Documented technical specifications and dependencies of applications
- Participated in the planning and execution of 10+ business continuity
- Ensured the performance, quality, and responsiveness of application
- Identified and corrected 10+ bottlenecks and 100+ bug fixes
- Suggested 20+ improvements to product design and functionality as informed by user-experience reporting

PROJECTS

Subhvivah.com

Creator

- It is a website for matrimonial services. This system provides a platform where bride or groom can register and search for each other. Agents can also get involved in this system.
- **Technologies used:** PHP, MySQL, HTML, CSS.

University Management System

Creator

- It is a website for maintaining all activities of a university online. Like from student registration, admission, examination and result publication, it eliminates manual work and provides faster and reliable online methods.
- **Technologies used:** PHP, AdminLTE, MySQL, HTML, CSS, Javascript.

Instagram

Creator

- It is a clone of Instagram where user can make their profile, upload images and follow or unfollow the other users. I have used 'StampAlike' template in this project. I have also used Intervention package for handling images.
- **Technologies used:** Laravel 6.0, MySQL, Vue.js
